

ACTUATION SYSTEMS for NURSING HOME PATIENT LIFT APPLICATIONS

TiMOTION provides a simpler actuation solution for patient lifts. We offer an alternative for medical environments that require safe and easy-to-use patient transfer.

This solution ensures safety and comfortability in patient lifts at nursing homes.

A SMART AND EASY TO USE ACTUATOR SYSTEM FOR PATIENT LIFTS

TC20 is a simpler control box for a patient hoist system which meets specific patient needs and secures a safe and comfortable transfer. It is portable and easily installable within nursing home applications.

TC20 KEY FEATURES:

- Built-in battery pack: 24V, 2.9Ah or 5Ah
- Charging with AC cable or plug directly
- IP rating: Up to IP66
- Cable management bracket (optional)
- Emergency stop button
- Easy installation, only two screws required
- LED power indicator on the battery pack (optional)

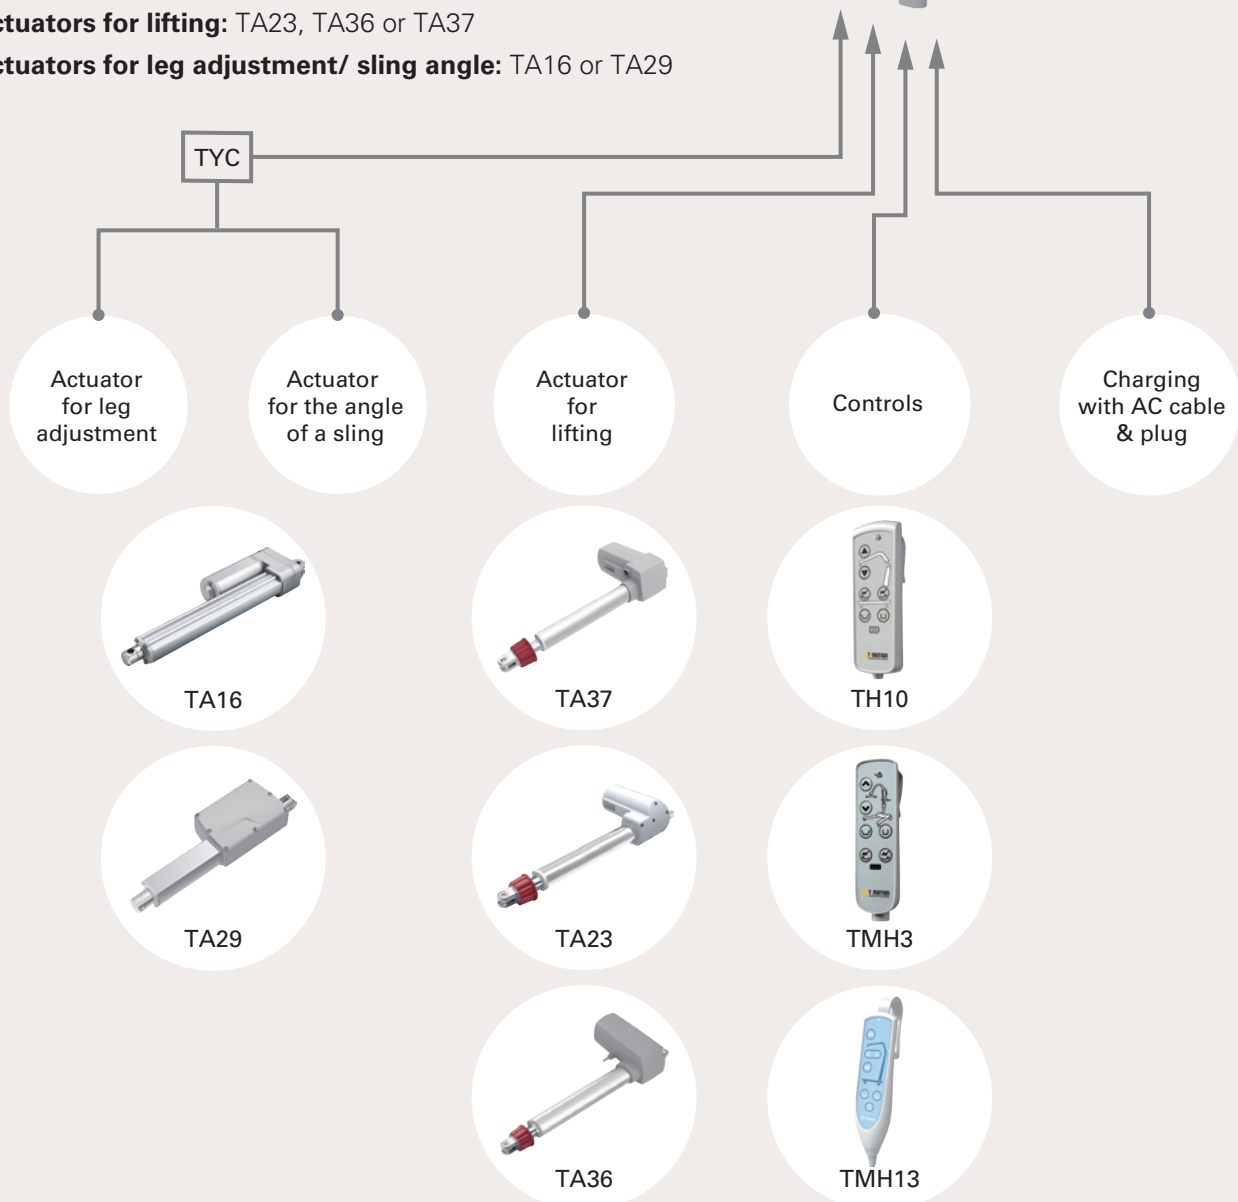

System Overview

Control box: TC20

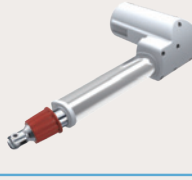

Control: TH10, TMH3 or TMH13

Actuators for lifting: TA23, TA36 or TA37

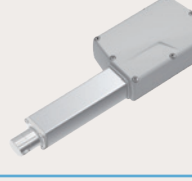

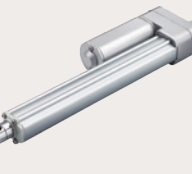

Actuators for leg adjustment/ sling angle: TA16 or TA29

Actuator for Lifting

Model	Maximum Load in Push	Maximum Speed at Full Load	IP Rating	Manual Release
 TA36	10,000N	5.4mm/s	IP66W	Available
 TA23	10,000N	3.2mm/s	IP66W	
 TA37	12,000N	5.3mm/s	IP66W	

Actuator for Leg Adjustment /Angle of Sling

Model	Maximum Load in Push	Retracted Length
 TA29	6,000N	≥ 178mm (depending on chosen options)
 TA16	3,500N	≥ Stroke+112mm

TMH13

TMH3

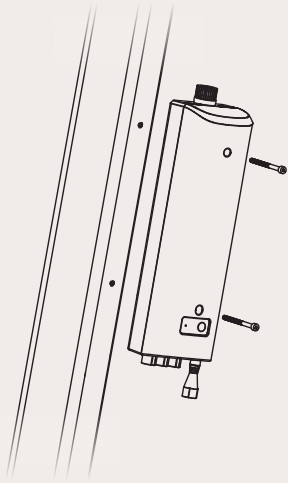

TH10

CONTROL TMH13, TMH3 or TH10 SERIES

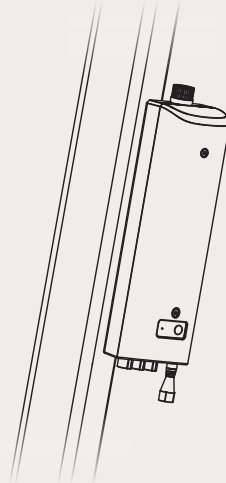

- TMH3 has a detachable handset cord
- Supports a maximum of three actuators
- LED indicator for the battery status
- Interface for lifting/ lowering, leg adjustments, and overload warning

Installation Guide

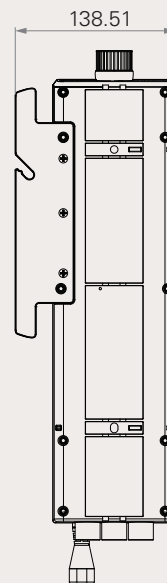

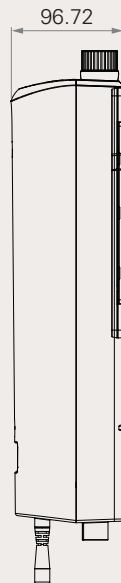

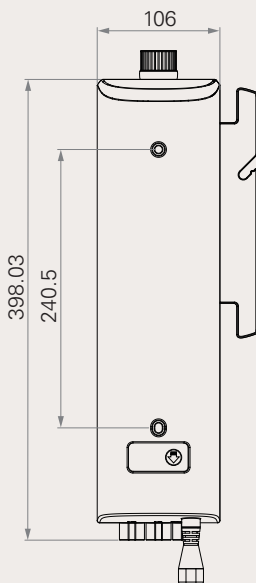

1. Install TC20 on the hoist frame

2. Install fixed screws of TC20. Make sure the screws are tightened properly
